

Python Quiz

1. What is the output of the following piece of code?

```
1 num = 10
2 while num > 0:
3     print(str(num) + "-" + str(num))
4     num = num - 2
5     if num == 6:
6         num = num - 1
```

Output

2. Circle **and correct** 6 all errors

```
1 sum == 0
2 while true:
3     print(Type a number to add [-1 to quit]: ,end:"")
4     newNum = int(input)
5     if newNum == -1:
6         break
7     sum = sum + newNum
8 print("\nYour total is: " + sum)
```

3. Perform a deskcheck on the following piece of code.

```
1 sum = 0
2 for x in range(5):
3     sum = sum + x
4     print(sum)
```

sum

x
