

Added the two new sensors?

What to do now?

1

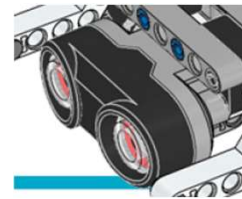

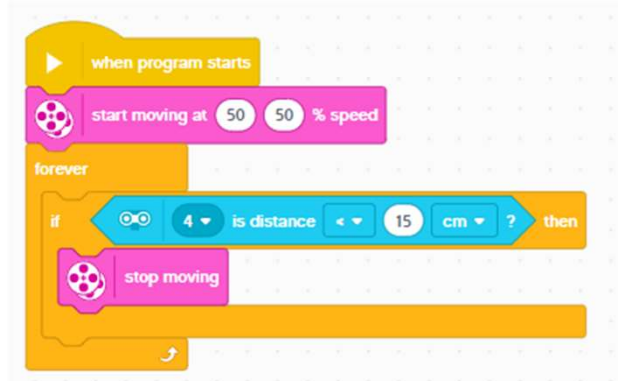

If you haven't installed the sensors, do that first

See my website for instruction manuals

2

Ultrasonic Testing

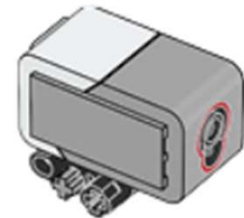

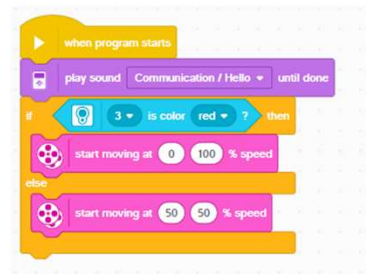

- What does this do?
- Test it facing a wall
- Can you change it so...
 - It gets closer to the wall?
 - It turns around and drives away instead?

3

Colour Sensor Testing

- What does this do?
- Test it! Hold a red block close to the sensor as your robot is finishing playing it's intro sound
- Can you modify this code to make other behaviour happen?
- Can you point it downward instead and react to the colours on the floor?
- Be creative!
