

2.3A Base Functions

Base functions are used as building blocks for more complicated functions. The list of base functions that you are **responsible** for are:

$$f(x) = x \quad g(x) = x^2 \quad k(x) = \sqrt{x} \quad h(x) = \frac{1}{x} \quad r(x) = |x| \quad q(x) = x^3$$

Key Properties of the Base Functions

Domain: Possible x values. **Range:** Possible y values.

Increasing: Intervals in the domain, where y increases as x increases.

Decreasing: Intervals in the domain, where y decreases as x increases.

Asymptotes: A line that the function approaches but never reaches.

y-intercept: The point where the relation crosses the y-axis ($x = 0$).

x-intercept: The point(s) where the relation crosses the x-axis ($y = 0$).

Finite Differences: The difference in y-values for consecutive x-values.

1) Linear Function	$y = x$													
Domain: $\{x \in \mathbb{R}\}$	<table border="1" style="margin: auto;"> <thead> <tr><th>x</th><th>y</th></tr> </thead> <tbody> <tr><td>-2</td><td>-2</td></tr> <tr><td>-1</td><td>-1</td></tr> <tr><td>0</td><td>0</td></tr> <tr><td>1</td><td>1</td></tr> <tr><td>2</td><td>2</td></tr> </tbody> </table>	x	y	-2	-2	-1	-1	0	0	1	1	2	2	
x		y												
-2		-2												
-1		-1												
0		0												
1		1												
2		2												
Range: $\{y \in \mathbb{R}\}$														
Increasing: $\{x \in \mathbb{R}\}$														
Decreasing: NONE														
Asymptotes: 0														
y-intercept: 0														
x-intercept: 0														
Finite Differences:														
<table border="1" style="display: inline-table; margin-right: 10px;"> <thead> <tr><th>x</th><th>y</th></tr> </thead> <tbody> <tr><td>-2</td><td>-2</td></tr> <tr><td>-1</td><td>-1</td></tr> <tr><td>0</td><td>0</td></tr> <tr><td>1</td><td>1</td></tr> <tr><td>2</td><td>2</td></tr> </tbody> </table> Common 1st Diff.	x	y	-2	-2	-1	-1	0	0	1	1	2	2		
x	y													
-2	-2													
-1	-1													
0	0													
1	1													
2	2													

2) Quadratic Function	$y = x^2$													
Domain: $\{x \in \mathbb{R}\}$	<table border="1" style="margin: auto;"> <thead> <tr><th>x</th><th>y</th></tr> </thead> <tbody> <tr><td>-2</td><td>4</td></tr> <tr><td>-1</td><td>1</td></tr> <tr><td>0</td><td>0</td></tr> <tr><td>1</td><td>1</td></tr> <tr><td>2</td><td>4</td></tr> </tbody> </table>	x	y	-2	4	-1	1	0	0	1	1	2	4	
x		y												
-2		4												
-1		1												
0		0												
1		1												
2		4												
Range: $\{y \in \mathbb{R} \mid y \geq 0\}$														
Increasing: $\{x \in \mathbb{R} \mid x > 0\}$														
Decreasing: $\{x \in \mathbb{R} \mid x < 0\}$														
Asymptotes: None														
y-intercept: 0														
x-intercept: 0														
Finite Differences:														
<table border="1" style="display: inline-table; margin-right: 10px;"> <thead> <tr><th>x</th><th>y</th></tr> </thead> <tbody> <tr><td>-2</td><td>4</td></tr> <tr><td>-1</td><td>1</td></tr> <tr><td>0</td><td>0</td></tr> <tr><td>1</td><td>1</td></tr> <tr><td>2</td><td>4</td></tr> </tbody> </table> Common 2nd Diff	x	y	-2	4	-1	1	0	0	1	1	2	4		
x	y													
-2	4													
-1	1													
0	0													
1	1													
2	4													

What does "absolute value" mean?

Absolute Value

The distance from the point to zero.

Distance is always positive, or zero.

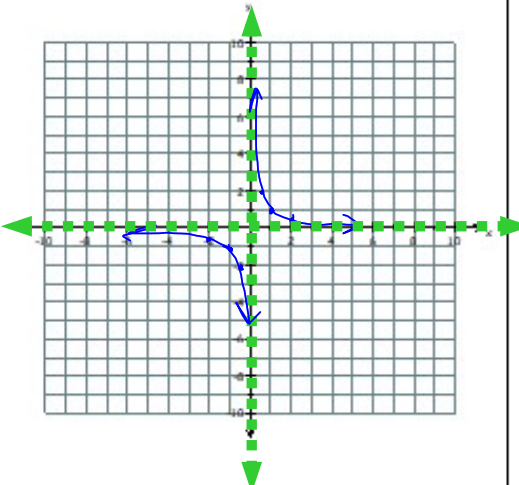

$$|5 - 13| = 8$$

$$|13 - 5| = 8$$

3) Absolute Value Function		$y = x $												
Domain:	$\{x \in \mathbb{R}\}$	<table border="1"> <thead> <tr> <th>x</th> <th>y</th> </tr> </thead> <tbody> <tr> <td>-2</td> <td>2</td> </tr> <tr> <td>-1</td> <td>1</td> </tr> <tr> <td>0</td> <td>0</td> </tr> <tr> <td>1</td> <td>1</td> </tr> <tr> <td>2</td> <td>2</td> </tr> </tbody> </table>	x	y	-2	2	-1	1	0	0	1	1	2	2
x	y													
-2	2													
-1	1													
0	0													
1	1													
2	2													
Range:	$\{y \in \mathbb{R} \mid y \geq 0\}$													
Increasing:	$\{x \in \mathbb{R} \mid x > 0\}$													
Decreasing:	$\{x \in \mathbb{R} \mid x < 0\}$													
Asymptotes:	None													
y-intercept:	0													
x-intercept:	0													

6) Rational Function (Reciprocal Function)	$y = \frac{1}{x}$																					
Domain: $\{x \in \mathbb{R} \mid x \neq 0\}$	<table border="1"> <thead> <tr> <th>x</th> <th>y</th> </tr> </thead> <tbody> <tr> <td>-2</td> <td>$-\frac{1}{2}$</td> </tr> <tr> <td>-1</td> <td>-1</td> </tr> <tr> <td>$-\frac{1}{2}$</td> <td>-2</td> </tr> <tr> <td>$-\frac{1}{4}$</td> <td>-4</td> </tr> <tr> <td>0</td> <td>UND.</td> </tr> <tr> <td>$\frac{1}{4}$</td> <td>4</td> </tr> <tr> <td>$\frac{1}{2}$</td> <td>2</td> </tr> <tr> <td>1</td> <td>1</td> </tr> <tr> <td>2</td> <td>$\frac{1}{2}$</td> </tr> </tbody> </table>	x	y	-2	$-\frac{1}{2}$	-1	-1	$-\frac{1}{2}$	-2	$-\frac{1}{4}$	-4	0	UND.	$\frac{1}{4}$	4	$\frac{1}{2}$	2	1	1	2	$\frac{1}{2}$	
x		y																				
-2		$-\frac{1}{2}$																				
-1		-1																				
$-\frac{1}{2}$		-2																				
$-\frac{1}{4}$		-4																				
0		UND.																				
$\frac{1}{4}$	4																					
$\frac{1}{2}$	2																					
1	1																					
2	$\frac{1}{2}$																					
Range: $\{y \in \mathbb{R} \mid y \neq 0\}$																						
Increasing: NONE																						
Decreasing: $\{x \in \mathbb{R} \mid x \neq 0\}$																						
Asymptotes: Horiz. $y=0$ Vert. $x=0$																						
y-intercept: NONE																						
x-intercept: NONE																						

$$f(x) = \frac{1}{x}$$

$$f\left(\frac{1}{2}\right) = \frac{1}{\frac{1}{2}}$$

$$= 1 \div \frac{1}{2}$$

$$= 1 \times \frac{2}{1}$$

$$= 2$$

Practice!

For each base function (parent function)

- Practice key points
- Key take-away pieces to memorize
- Graph

$$f(x) = x \quad g(x) = x^2 \quad k(x) = \sqrt{x} \quad h(x) = \frac{1}{x} \quad r(x) = |x| \quad q(x) = x^3$$
